

INSTITUTE OF INTERNATIONAL CONTAINER LESSORS

FOR IMMEDIATE RELEASE

August 1, 2007

Preferred Specification for Supply of New (OEM) Bias Ply 10:00 x 20 Tire, Tube, Flap, Rim & Lock

BRIARCLIFF MANOR, NEW YORK— Today, IICL President Steven Blust announced that effective August 1, 2007, the IICL has issued the Preferred Specifications for new tires, tubes flaps, rim and locks. IICL recognizes that the tire, tube flap and rim work together as a system to hold air and safely support the gross weight of the chassis equipment and cargo.

The release of this tire standard is the first in a series of recommendations that will later include more detailed information regarding tubes, flaps and rims. It should not be construed as a single “solution” to proper tire specifications.

IICL CTB 005 was prepared under the supervision of the following representatives:

TAL
Flexi- Van
Trac Lease

Lew Vitalis
Rich Bachrach
George Braun
