GUIDE FOR FLATRACK REPAIR RELEASED

WASHINGTON, DC - Today, IICL President Steven R. Blust announced the release of the Institute's latest publication entitled, "The Guide for Flatrack Container Repair". This manual, the first of its kind, was developed to offer comprehensive instruction for repairs to flatracks in service today.

The manual is unique in that it includes various photo essays for the complex repairs of critical structural components unique to this equipment type.

The manual was developed under the direction of Robbie Burns of Amficon and Lew Vitalis and Mike Chilkotowsky of TAL International. A flatrack designer and manufacturer also assisted with their expertise and support of this manual.

The manual may be purchased at the introductory price of US\$45.00 via IICL's Online Store at www.iicl.org

The Institute of International Container Lessors, Ltd. (IICL) is a trade association, organized in 1971, representing lessors of maritime containers and intermodal chassis. Its member companies are Amficon, CAI, Cronos, Flexi-Van, Florens, GE SeaCO, Gold, Seacastle, Textainer, Trac, TAL International and Triton. IICL members own or manage approximately 90 percent of the global leased container fleet, representing nearly half of the world container fleet and half of the U.S. chassis fleet operated by ocean carriers, railroads, and other companies. The IICL is active in governmental, regulatory, educational, technological, environmental and security issues. In addition to its widely accepted publications and annual inspector certification examinations, the IICL offers a wide range of educational training courses.
